LIST OF EXPERIMENT 25

25. Install a C compiler in the virtual machine created using virtual box/ VMWare Workstation / Player and execute Simple C Programs.

Aim

To install a C compiler inside a virtual machine created using Oracle VirtualBox/VMware Workstation and compile and execute simple C programs successfully.

Procedure

1. Start Oracle VirtualBox/VMware Workstation and launch the previously created virtual machine.
2. Log in to the Linux operating system installed inside the VM.
3. Open the Terminal.
4. Update the package information using:
`sudo apt update`
5. Install the GCC C compiler using:
`sudo apt install gcc`
6. Verify that GCC has been installed successfully:
`gcc --version`
7. Create a new C program using a text editor. For example:
`nano hello.c`
8. Enter a simple C program:
9. Save the file and exit the editor.
10. Compile the C program using:
`gcc hello.c -o hello`
11. Execute the compiled program:
`./hello`
12. The output will be displayed in the terminal:
Hello World!

Result

The GCC C compiler was successfully installed inside the virtual machine. Simple C programs were successfully written, compiled, and executed, and the expected output was obtained.
